

Flange Width Gauge

PRECISE AND REPEATABLE MEASUREMENTS

Spring-loaded pins easily position flanged can body on the gauge. The precision anvil and carbide probe tip are factory set at precisely zero degrees. The flange may be continuously rotated 360 degrees to measure flange consistency.

Features

- Precision positioning
- Fast, simple, and positive can positioning
- Spring-loaded pins strike the can body wall
- High repeatability among operators
- No flange deflection from spring-loaded pins
- Directly interfaces to SeamMate® System
- Accommodates 202 to 603 cans
