

Consists of a precision stand with digital micrometer interfaced to the SeamMate® System; measures can diameters with no part changes.

## Features

- Fast, simple aerosol can positioning
- No parts changes required for different diameters
- High DODS repeatability among operators
- Zero drift precision digital micrometer
- Rugged design
- Directly interfaced to SeamMate System

## Specifications

- Measures double seam diameters 202 to 300
- Digital indicator resolution 0.0001"
- Typical R&R results: < 10% Precision to Tolerance ratio
