OneVision Corporation

SeamMate® System
FAST, ACCURATE, USER-FRIENDLY

The SeamMate System is the canning industry's most powerful turnkey system to inspect double seams and provide easy-to-use information to ensure double seam quality.
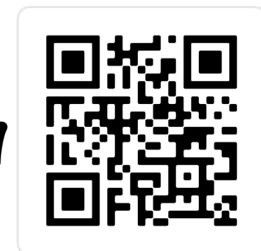

Features

- Fast, accurate, user-friendly precision gauging system
- Easy-to-use SPC graphics with AutoAlert process tracking
- Easy access to data for meaningful display, analysis, or reporting
- Seamer condition at a glance using SeamVision™
- Fits into your network environment

- High-Precision Microscope
- HD Digital Camera
- Durable Stainless Steel
- Multiple LED Seam Illumination
- Automatic Seam Brightness
- Automatic seam dimensions in under 1/4 second

Patented Technology

Automatic Double Seam Tightness

During the inspection process, SeamMate® software automatically calculates seam tightness by analyzing the geometry of captured seam images.
