

The WeighMate System helps your team monitor fill and net weights and quickly identify issues and opportunities. Reports can be customized to meet your company's specific weighing needs.

## Features

- Process information where you need it
- Process Control and Analysis using Red, Amber, and Green color coding
- Revolving graphical reports show developing trends in easy-to-understand graphics
- Supervisor controls critical points
- Includes Doran Weigh Scale
- System requirements: Windows 10, 64-bit PC

## Network Issues? No Problem.

OneVision's **DataSync** enables inspectors to continue the weighing process uninterrupted if your plant network experiences an outage. The database is automatically updated when the network recovers.

## Harsh Production Environment?

The WeighMate System is available as an enclosed unit for harsh production environments. Ask your sales manager for details.

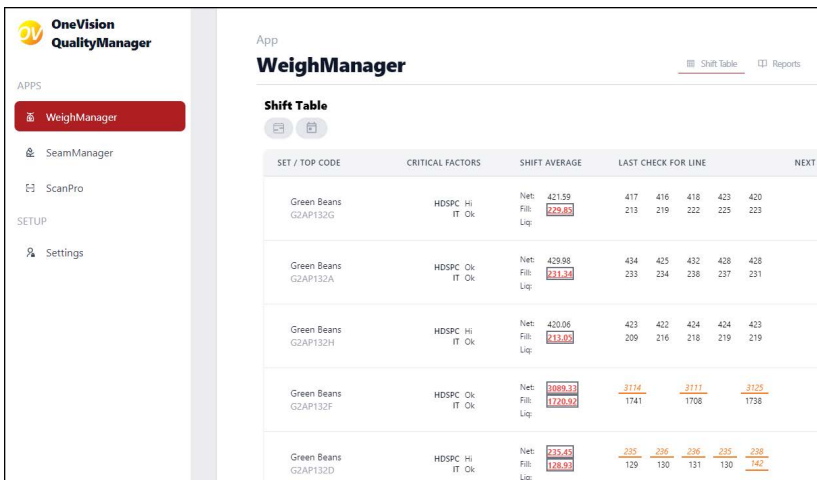

## WeighManager

WeighManager enables your team to access line inspection records and comprehensive reports at the weigh station(s) and on any networked PC.

### Go Paperless!

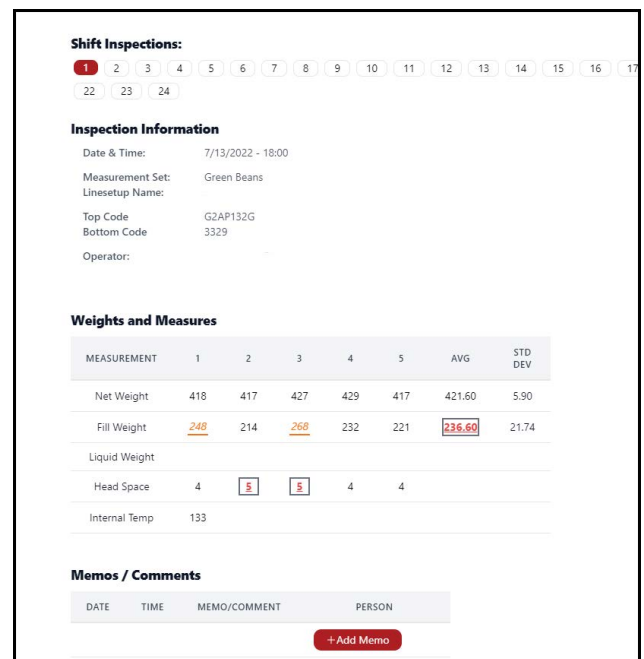

Your company can finally ditch the paper reports with OneVision's e-signature. Digital signatures comply with 21 CFR Part 11.
