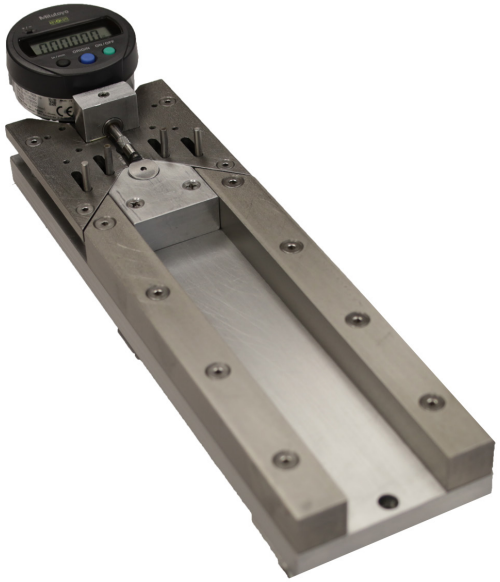
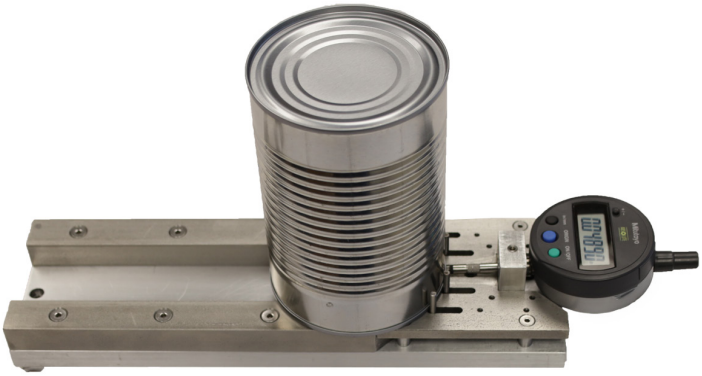
Stand-Alone Seam Thickness Gauge

PRECISE AND REPEATABLE MEASUREMENTS

Engineered for accurate seam thickness measurement, this gauge features a precision anvil and carbide probe tip factory-set at four degrees. Cans can be continuously rotated 360 degrees to evaluate thickness consistency around the entire seam.

Features




- Fast, simple can positioning
- Spring-loaded pins ensure consistent seam contact
- High repeatability among operators
- Standalone operation or SeamMate® System integration
- Compatible with 200-603 sanitary can sizes or beverage cans
